Academic Research

UT Austin / Oxford University COVID-19 Government Response Tracker

Under the direction of Dr. Becky Kester at The University of Texas Austin, a team was assembled to collaborate with The University of Oxford to collect information on common policy responses governments have taken to respond to the pandemic. The team focuses on 18 indicators such as school closures and travel restrictions. Team members were selected using an initial written application, an interview, and online testing. College class credit is earned. The team meets weekly. I am a Policy Coder, which requires 10-15 hours per week working virtually on the project.
